The annual billing for rates charges takes place in July and is reflected in this report. The amounts for rates and service charges do not represent cash received but levied amounts.

Total revenue received to date was R352.193 million which represents 93.34% of the total operating revenue budget for the year.

The following is highlighted with regards to the variances in Revenue:

Interest earned – outstanding debtors: A negative YTD variance of 23%, as a result of the reduction in interest rates from the initial budgeted rate upon the drafting of the budget. This is however an indication that the debt collection effort is currently not sufficient and that we are carrying stale debt that require a consideration for write-off.

Fines, penalties and forfeits: A negative YTD variance of 82%. It must be pointed out that the iGrap1 consideration still needs to be done where all fines issued needs to be recognised as revenue, this will only be done upon the compilation of the annual financial statements. It needs to be pointed out that there was a significant reduction on fines revenue from April as a result of Covid -19 and the subsequent lockdown that negatively impacted on the issuing of fines.

Licences and permits: A positive YTD variance of 10%, as a result of more licences and permits that were issued. The lockdown also influenced this revenue item to the negative.

Agency Services: A negative YTD variance of 20%. The under-recovery is due to a decrease in the roadworthy - and drivers licence test during the Lockdown period, it is however anticipated that the license fees revenue will be recovered in the next financial year as license fees renewals that were postponed become due and payable.

Transfers and subsidies: A negative YTD variance of 19% due to Grant revenue that will be recognised in period 13 upon the compilation of the annual financial statements.

Please refer to table C4 for a Breakdown of Revenue by Source.

Operating expenditure by type (Table C4)

The total expenditure to date is R309.2 million which represents 78.42% of the total operating expenditure budget for the year.

With regards to the variances in respect of expenditure the following is highlighted:

Debt impairment: A negative YTD budget variance of 84% is reflected as a result of journals in respect of the provision for irrecoverable debt that still needs to be done as part of the year-end processes.

Depreciation & asset impairment: A negative YTD budget variance of 33% is reflected as a result of journals in respect of the provision for irrecoverable debt that still needs to be done at year-end.

Finance charges: A negative YTD budget variance of 46% is reflected. The variance is mainly due to non-cash items. The journals in accordance with GRAP will only be processed once the results of the actuarial calculations are known.

Contracted services: A negative YTD budget variance of 45% is reflected mainly due to expenditure pertaining to the Housing grant being treated differently for budget and GRAP purposes. For budget purpose it is included as expenditure, but for GRAP purposes it is treated as an agency service.

Other expenditure: A negative YTD budget variance of 36% is recorded. The under expenditure is due to various factors such as:

- Internal charges which was budgeted for as an expense. For GRAP purposes, all internal charges are reversed.
- Travel and subsistence, license Fees, Printing Costs, Training and Safety Clothing – due to the lockdown period there is a decrease in this expenditure

Refer to Table C4 for further details on both revenue by source and expenditure by type.

3.6 Conclusion

The municipality is in a position to service its current commitments yet the cash position is not yet ideal if measured against best practice norms, especially when considering the cash backing of reserves and short term provisions. The effect of COVID-19 is still evident on the municipal budget as revenue in respect of service charges are below prior year-to-date comparatives. The cash flow is under pressure as consumers and ratepayers are struggling to make ends meet and have less disposable income available to make payments on municipal accounts.
